To Whom It May Concern:

Renaissance Roofing recently completed a major slate roofing project to our church building, First Presbyterian Church of Oklahoma City, OK. This involved complete removal of the buildings slate tiles and underlayments, replacing the underlayments, reusing the slate tiles that were still in good condition and replacing all copper flashings, counter flashing, valleys and copper gutter work. Renaissance Roofing needed to match our existing slate tiles with new slate tiles from the quarry in Vermont and did an excellent job matching them.

Renaissance Roofing did an outstanding job repairing damage that had occurred through years of neglect. Their workmanship and knowledge was very apparent. They preformed their contract without any issues. They kept us informed throughout the project and made specific recommendations of problems found as work progressed. Their skill in working with copper was apparent as they needed to follow the original blueprints from the buildings construction. They made the new copper work match exactly what was originally there. The educational, chapel and fellowship hall portion of our building was built in 1954. The Sanctuary was built in 1963.

Renaissance Roofing was a pleasure to work with. I would highly recommend them for any roofing project involving slate tiles, regardless of size.

Sincerely:

Wayne Osmond
